

PRODUCT INFORMATION

Stahls' offers a large variety of materials to meet all of your heatseal needs. Wellington House is currently carrying products in the materials listed below.

Thermo-FILM®

The world's #1 material for team numbers and letters. Create one, two and three color looks in just seconds. Patented polyester adhesive combined with light weight urethane. Won't fade, peel, chip or scratch. Dry cleanable too! Great combined with screenprinting or transfers. Removable with Stahls' Solvent. USE ON: Teamwear, caps, T-Shirts and more!

Thermo-FLOCK®

Flock's soft, velvety finish is the number one choice when creating custom looks on corporate and fashion wear. #1 in Europe for soccer uniforms. Excellent when combined with transfers. Removable with Stahls' Solvent. USE ON: Soccer uniforms, T-Shirts, work uniforms, caps and more.

Thermo-GRIP®

Use on meshes and nylon micro knits where you can't use Thermo-FILM. Applied appearance similar to Thermo-FILM. Can be combined with Thermo-FILM for a two-color look, use Thermo GRIP as a background. USE ON: Basketball, hockey, football, soccer and other sports jerseys.

Poly-TWILL™

Poly-TWILL™ is a 100% polyester twill material with a thermal adhesive backing, for a high quality look with custom appliques and sewn lettering. Used on most pro uniforms. Sew around the edges to prevent fraying. Available by the yard for banners and larger products. USE ON: Football, hockey and other uniforms, college and Greek sweatshirts, jackets, banners and flags.

SC Premium™ Transfer Paper

Stahls' SC Premium™ Paper is used for creating full color transfers with a color copier. Can be heat applied to light colored 100% cotton, 100% polyester and poly/cotton blends.

INKTRA® Transfer Paper

Stahls' INKTRA® transfer paper is great for quick turn around time on custom made designs. For use with all inkjet printers. Use on light colored fabrics, 100% polyester and poly cotton blends.

CAD-CUT® Reflective

Works great for improved visibility or just to grab attention. Use on work outfits or exercise gear.
Note: Does not meet OSHA safety standards.

CAD-CUT® Thermo-GRIP®

All the properties of Thermo-GRIP mounted on a mylar carrier. For use on nylon meshes and knits. Can be combined with Thermo-FILM for a two color look. USE ON: Basketball, hockey, football, soccer and other sports jerseys.

CAD-CUT® Thermo-FILM

All the qualities of Thermo-FILM® mounted on Stahls' patented Magic Mask™ mylar carrier. For your one and two color jobs. Works best with letters 1/2" or larger - great for player names. Remove wax carrier before application. Removable with Stahls' Solvent. USE ON: T-Shirts, uniforms, caps, fleece, and canvas bags.

CAD-CUT® Gorilla-GRIP™ II

Service the high profit niche of custom printed jackets. Works on most woven nylons. Designed to solve your tough nylon decorating problems. New Gorilla Grip II can also be used on cotton, polyester or spandex blends. USE ON: Jackets, equipment bags, jogging wear, ski wear and other nylon sportswear items you once thought impossible to print!

CAD-CUT® ECONOPRINT™

The answer for customers who want an economical and durable graphic. Athletic teams will appreciate this low cost option. Excellent for detailed designs. Two step application. For best results, use garments made of: 100% cotton, 100% polyester, or poly/cotton blends. USE ON: Sports uniforms, caps, fleecewear, canvas bags.

CAD-CUT® Thermo-FLOCK®

Thermo-FLOCK mounted in reverse on a mylar carrier. Works best with lettering 1/2" or larger. Great on corduroy and textured fabrics. It's very easy to weed and apply, with a one step application. Removable with Stahls' Solvent. USE ON: Caps, T-shirts, corporate wear.

SPORT STITCH®

The great look of sewn twill without sewing! Stahls' patented Sport Stitch® eliminates the need to use your sewing machine. We pre-stitch the edges of our durable Poly-Twill®. All you do is heat apply. Sport Stitch® applies to 100% polyester, 100% cotton blends and polyester mesh.
